Gwinnett’s curriculum for grades K–12 is called the Academic Knowledge and Skills (AKS) and is aligned to the state-adopted Georgia Standards of Excellence in Language Arts, Mathematics, Science, and Social Studies for elementary school students. Gwinnett’s AKS is a rigorous curriculum that prepares students for college and 21st century careers in a globally competitive future.

The AKS for each grade level spells out the essential concepts students are expected to know and skills they should acquire in that grade or subject. The AKS offers a solid base on which teachers build rich learning experiences. Teachers use curriculum guides, technology, and instructional resources to teach the AKS and to make sure every student is learning to his or her potential.

The Academic Knowledge and Skills curriculum was developed by our teachers, with input from our parents and community, in response to Gwinnett County Public Schools’ mission statement:

*The mission of Gwinnett County Public Schools is to pursue excellence in academic knowledge, skills, and behavior for each student resulting in measured improvement against local, national, and world-class standards.*

Read on to find out more about what your child will learn during 5th grade and how you can support your child’s learning at home. We encourage you to talk to your child about what he or she is learning.

WELCOME TO 5TH GRADE!
Learning to read and write is the basis for all learning. In 5th grade, students work on reading and writing skills that will lead to success in subsequent grade levels. Specifically, the focus is on reading with sufficient accuracy, rate, and expression to support comprehension of fiction and informational (non-fiction) texts. Students use reading and writing skills throughout the school day as part of Language Arts, Mathematics, Science, and Social Studies classroom activities. The AKS emphasizes literacy skills across the content areas. Activities include shared reading and writing experiences, small-group guided reading, and independent reading and writing times—all within the context of the balanced literacy classroom.

By the end of 5th grade, all students are expected to:

- Know and apply grade-level phonics and word analysis skills in decoding words;
- Apply grade-appropriate language skills in writing;
- Self-select books, self-monitor to correct errors when reading and writing, and talk with and listen to peers about one's reading and writing to become lifelong readers and writers; and
- Use listening, speaking, reading, and writing skills to communicate throughout the day.

Balanced Literacy

Teachers follow these principles to determine the best teaching methods, strategies, and materials to meet the needs of our students:

- Learning to read and write is a complex process with many facets.
- Reading and writing are about experiencing language, not merely practicing isolated skills.
- Reading and writing are interconnected forms of communication that emerge from listening and speaking.
- There is no "one way" to teach reading or writing. Teachers will incorporate a wide variety of strategies to teach every student.
- Learning to read and write occurs along a developmental progression of stages.
- All children can learn to read and write along this developmental progression with guided instruction.
- Knowing where each child is developmentally enables teachers to plan, teach, and evaluate appropriately.
- Children should be immersed in a print-rich environment.
- Reading and writing to, with, and by children should occur daily.
- Each day, children should have opportunities to read fiction and informational materials they select themselves and write on self-selected topics.
- Reading and writing are integrated into all subject areas.

Speaking and Listening

5th graders listen to and write about a variety of literary forms, such as stories and poems, in a variety of fiction and non-fiction (informational) genres. These include legends, drama, biographies, technical texts, and media. They learn to refer to details and examples in the text. They communicate in conversation by engaging in discussions with peers. Students analyze various literary and non-literary elements, such as character, setting, plot, compare/contrast, theme, cause/effect, and main idea and key details.

Reading

5th graders read and analyze a variety of both literary and informational texts. These include drama, poetry, myth, and non-fiction texts. Students relate themes in what they read to personal experience. They make well-developed connections and analyze authors’ use of various elements of writing for effect and purpose. 5th graders are expected to read grade-level texts with accuracy and fluency in order to effectively comprehend what they read.

Language (Phonics, Spelling, Vocabulary, Grammar, and Handwriting)

By the end of the year, students should be able to read and spell words with selected patterns and common high-frequency words. During the year, teachers assess students' ability to use these words correctly in reading and writing. Students also practice clear and legible cursive.

Writing

At this grade level, students write opinion pieces on topics or texts that support a point of view and write informational and opinion pieces to examine a topic and share information clearly. They write narrative stories to develop real or imagined experiences. 5th graders use the elements of writing style—audience awareness, voice, and rich, descriptive language—to make their writing interesting and informative. They use grade-appropriate grammar, spelling, capitalization, and punctuation in their writing. Students revise and edit their own work.

- Encourage your student to select his or her own reading material—whether that’s a how-to book, a joke book, a special-interest magazine, or a graphic anime novel.
- Watch for reading problems. If your student has trouble with routine reading (signs or instructions), reads at a very slow pace on assigned reading, or avoids pleasure reading, he or she may benefit from extra reading support at school and at home.
Mathematics

In the Mathematics classroom, students grow into confident, competent problem-solvers. They develop their understanding and use of numbers as they explore how mathematics connects to the real world. As they apply their learning in context, students develop their ability to think critically, reason mathematically, and communicate effectively.

Learning in 5th grade focuses on developing number sense, understanding and using numbers through mathematical operations, fractions, geometry, measurement and data, and algebraic thinking. By the end of 5th grade, students should be able to do the following:

- Apply the four operations to decimals to tenths;
- Extend division to two-digit divisors;
- Develop fluency with addition and subtraction of fractions;
- Apply multiplication and division understanding to fractions;
- Understand concepts of volume and relate volume to multiplication and to addition;
- Convert like measurements within a given measurement system; and
- Graph points on a coordinate plane to solve real-world and mathematical problems.

5th grade students use a number of strategies and tools as they learn math. They use a variety of representations to demonstrate their knowledge, such as concrete/pictorial, verbal/written, and numeric/data-based. Students use fraction models, cubes, and rulers. They use technology, data, and problem-solving strategies.

- Discuss fractions used in daily life (recipes, interest rates, carpentry, etc.).
- Ask your child to explain his or her answers on math problems. How does your student know the answer is correct?
- Compare and contrast the volume of different household items (cereal boxes, buckets, refrigerator, etc.).

Science

5th grade students study earth, life, and physical science through inquiry and investigation. Students design and conduct experiments using the scientific method. They formulate conclusions based on their results. Students demonstrate the relationships discovered in their experiments through graphs and charts. They explore jobs in science.

Science and Engineering Practices

5th graders use scientific equipment to make observations and measurements while conducting experiments. They recognize which equipment to use for a specific measurement. Students understand the importance of metric measurements in science. They practice safety in the science lab and use scientific tools.

Types of Science

Earth Science

5th graders analyze Earth’s surface and explain how features are caused by constructive and destructive processes. Students explain the role of technology—for instance, dams, levees, and storm drain management—in the control of these processes.

Life Science

Students classify organisms to simplify the study of living things. They sort animals and plants into groups, based on external features. Students study beneficial and harmful microorganisms. They identify the cell as the building block of living organisms. 5th graders use microscopes to observe cell structure. Students compare and contrast learned behaviors and inherited traits and the role genes play in the transfer of traits.

Physical Science

5th graders distinguish between physical and chemical changes. They investigate the properties of substances before, during, and after a change. Students investigate electricity, magnetism and circuits.

- Bake a cake together. Discuss the difference in the substances before and after they are baked. At which point did a chemical change occur in the ingredients?
- Look through family photographs with your child. Point out common features of family members. Inherited traits—such as eye color, height, and the shape of the nose or ear—are passed through generations of families and can be observed by looking at external features.

Interpretive Skills/Where We Live/Personal Finance

5th grade students study earth, life, and physical science through inquiry and investigation. Students design and conduct experiments using the scientific method. They formulate conclusions based on their results. Students demonstrate the relationships discovered in their experiments through graphs and charts. They explore jobs in science.

Learn more about the Science AKS online.

Social Studies

GCPS’ Social Studies program prepares students to participate as constructive citizens in a democratic society. Students understand their role and responsibility as citizens. They discover America’s heritage and its role and responsibility in the world. Students relate the past to the present. They learn the similarities and differences between nations, cultures, and peoples of the world. Students interpret maps and globes, process information, and solve problems. Students will learn how beliefs and ideas influence decisions and laws, how conflict causes change, how actions affect society, and how the movement of people and the spreading of ideas affect everyone.

- Help your child to connect votes in Atlanta and Washington, D.C., with everyday life. How does a vote on college tuition affect your family? How about a local zoning decision?
- Use family vacations to learn more about the geography and history of the United States.

Our Nation

In the K–5 Social Studies program, students focus on Our Heritage, studying the history and geography of the U.S. in 5th grade. Students focus on key events, people, and places of the United States—including American inventors, westward settlement, World War I, the Great Depression, World War II, the Cold War, and America since 1975. 5th graders study causes and consequences of wars and key economic developments. They focus on citizens’ rights and responsibilities and the importance of being good citizens. (See the section on Character Education to learn more about this area of emphasis.)
Students in elementary school are at a critical age to develop the creative skills that will set the foundation for successful careers. In fact, creativity is ranked as one of the top skills sought by employers.

Visual Arts
In grades 3–5, visual arts students sharpen observational skills and increase technical skills. Through repetition in the elementary grades, students master art concepts. They distinguish differences between artworks from around the world and across the centuries. Children study the movements of Realism, Expressionism, and Structuralism in art history. Students explore art careers. They interpret and analyze works of art.

5th graders use a broader range of subject matter and media. As students learn about art, they create works of their own. They make drawings, paintings, sculptures, prints, pottery, fiber art, mixed media, and digital images. Students explore color, texture, value changes, contrast, and contour. They focus on design, composition, and form in their work. They use technology to create art.

- Embrace your child’s creativity. “Commission” a portrait by your student.
- Ask your child to serve as the family photographer on vacation. Work together on a scrapbook of the photos.
- Talk to your child about playing an instrument in the middle school band or orchestra.

General Music
The music program for grades 3–5 creates a foundation for further music study in middle school. Students experience a variety of music styles through listening, moving, creating, singing, and playing instruments. Discussion and reflection support their musical understanding.

Students learn to perform harmonies through rounds, echo songs, and partner songs. They perform alone and in groups. Children create simple compositions and accompaniments. They create movements for musical dramatizations and interpretations.

5th graders are exposed to music of diverse cultures and time periods. They explore careers in music. Children demonstrate melodic direction. They recognize phrases and structures in musical form. Students explore differences in register and tone quality. They demonstrate expressive qualities of music. Students identify families of musical instruments by sound and sight.

5th graders learn how to read music, including standard notation, scales, and musical symbols.

Theatre and Dance
A number of our elementary schools offer theatre and dance programs.

The essentials and foundations of literacy start at an early age and theatre programs support these skills through the use of the individual and expressive voice of the student.

Dance courses support the study of music as well as movement and exercise which is imperative for young bodies and minds to develop.

Health
In Health, students learn how to live a healthy lifestyle and reduce the risks linked with illness and injury. They also learn the consequences of unhealthy behaviors. Students learn to be responsible for their decisions and actions, and to understand the influence they have on others. Each year, students learn grade-appropriate lessons about emotional health, relationships, nutrition, the benefits of physical activity, substance abuse prevention, basic human anatomy, personal health, and safety.

5th grade students know first aid for a variety of emergencies. Lessons focus on risk factors and choices that might cause or prevent health problems. Students identify refusal skills needed to resist peer pressure. They understand the effects and consequences of substance abuse. Children understand how to read food labels to make healthy choices. They identify ways to manage stress. Students develop a better understanding of the physical and emotional changes during puberty. The immune and endocrine systems and reproductive anatomy are part of the 5th grade curriculum.

Physical Education (PE)
Physical Education emphasizes lifetime fitness, physical activity, and skill development. Through carefully planned classes, students learn the importance of physical activity— for their health and for their success in school. The curriculum promotes increased fitness as students acquire skills and develop physically.

In PE, students learn about physical activities that enhance their health. Students develop skills such as throwing, catching, and striking a variety of objects with a body part and with other equipment, individually and in game-like situations. 5th graders combine movements in a variety of sequences and patterns. They participate in fitness assessments and goal-setting. Parents will receive a fitness assessment report on their child at the end of the school year.

- Take your child grocery shopping. Ask your child to check labels and help you make healthy choices.
- Give your child chores requiring physical exertion. Keep in mind his strength, coordination, and maturity.
- Reinforce what your child is learning about peer pressure. Share your expectations. Role-play situations your child might encounter.

Fine Arts

MYeCLASS Student Portal Information
Gwinnett County Public Schools’ Student Portal is MYeCLASS. The Student Portal is an online environment that gives students access to their online course pages; a selection of digital textbooks that correspond to the individual student’s class schedule; additional resources, such as the Student/Parent Handbook; links to websites that support what students are learning; the online research library; a media catalog; databases of general reference materials; eBooks; and the student’s grades.

Students log into MYeCLASS using their GCPS student number and the password they create at the beginning of the school year. MYeCLASS is available around the clock, from any device with an Internet connection. Find a link from the GCPS home page at www.gwinnett.k12.ga.us.
Specialized Programs and Services
The school system provides a variety of specialized programs and services, including Title I, English to Speakers of Other Languages (ESOL), Special Education, Gifted Education, and alternative education programs. Guidance, social work, and psychological services provide for students’ emotional and physical needs, along with limited clinic services for all students and specialized nursing support for medically fragile children. The School Nutrition Program operates cafeterias in every GCPS school. Some programs and services have eligibility requirements and require testing for admission. On this page, learn more about some of these programs and services.

Gifted Education
The GCPS Gifted Education program, called FOCUS at the elementary level, provides academic challenges for children who are intellectually advanced. The program offers valuable learning opportunities that are advanced in content. Gifted education classes offer experiences that extend GCPS’ AKS curriculum, and develop students’ thinking strategies and processes. Classes are taught by teachers with gifted certification. Students served through the Gifted Education program meet eligibility requirements set by the state. Both student performance and results on national assessments are used to determine a child’s participation in the program.

Special Education and Psychological Services
GCPS’ Department of Special Education and Psychological Services focuses on meeting the educational needs of students with disabilities, beginning at age 3. They must meet the eligibility requirements set by the Georgia Department of Education. GCPS provides comprehensive special education programs and services, including assessment and interventions.

English to Speakers of Other Languages
Students whose primary or home language is other than English and who are not yet proficient in English are provided with support services through the English to Speakers of Other Languages (ESOL) program until they attain proficiency. ESOL instruction develops skills in listening, speaking, reading, and writing in social and instructional language as well as in the academic language of language arts, mathematics, science, and social studies. Students learning English are taught by highly qualified teachers who are fully certified experts in their field.

Character Education
The school system supports a mandate from the Georgia General Assembly requiring all schools to teach character education. Society and culture are tied together through common threads that guide the way we live, work, and learn. These common beliefs are taught at home and reinforced by the community, schools, religious institutions, and youth service groups. These basic tenets guide the way Gwinnett County teachers teach and the way the school system conducts the business of teaching and learning. Character education is thoroughly embedded in the AKS curriculum.

Advisement and Counseling
Counselors partner with families and teachers to remove barriers to student achievement. They deliver a comprehensive, data-driven, and developmentally appropriate program. Lessons explore the areas of academics, careers, and social/emotional life skills. Counselors build strong relationships with their students through core lessons in the classroom, small-group counseling, and individual counseling.

Technology/Information & Media Literacy
The school media program contributes to your child’s academic achievement and prepares him or her to live and work in our information-rich society. Available resources include books and magazines for pleasure reading and research, an online catalog for locating materials, and computers that provide access to online instructional resources that are age-appropriate. In a GCPS Media Center, your child will find a state-certified, full-time media specialist who supports teaching and learning and encourages lifelong reading. The media specialist collaborates with teachers to help your child learn to locate, analyze, evaluate, interpret, and communicate information and ideas.

Tips for Parents on 10 Things You Can Do to “Be There” for Your Child

BE…
• An Involved Parent… Be attentive, aware, together
• A Role Model… Be caring, engaged, influential
• A Cheerleader… Be supportive, positive, fun
• A Partner… Be encouraging, working together
• Their Favorite Teacher… Be there for teachable moments

• A Friendly Critic… Be patient, accepting, flexible
• An Advisor… Be ready to help, share your experiences
• A Good Communicator… Be a talker, a listener, stay connected
• A Lifelong Learner… Be inquisitive, share, read together
• An Advocate… For your child, school, community, public education
Research shows that when parents are involved in their children's education at home, their children do better in school. When parents are involved at school, their children's achievement increases and the schools they attend become even stronger.

Be There is a national movement that inspires parents to become more involved in their child's education and their public schools. Teachable moments are everywhere. You can be your child's favorite teacher by connecting in meaningful ways as you go through the ordinary routines of the day… driving in the car, preparing a meal, shopping, or doing chores. Below and throughout this brochure, you will find tips for helping your child have a successful 5th grade experience. Look for more helpful tipsheets and other resources on the school system web site and your local school web site.

- Talk to your child about what he is learning at school. Use this brochure as a reference. You can find a complete listing of the 5th grade AKS on the school system’s website (www.gwinnett.k12.ga.us).
- Promote the importance of regular school attendance and being on time. Stress that school is a family priority and being in class each day is very important.
- Stay informed on school and class happenings. Read newsletters and reports that come home. Check the school website and district website for updates.
- Ask to see your child’s work. Keep samples so you can see and celebrate the growth your child makes this year.
- Become involved in the PTA and attend school events. Be a school volunteer if you are able.
- Read, talk, and listen to your child often and about a variety of subjects.
- Let your child know that his or her academic success is important to you. If your child struggles, be encouraging. Praise progress made.
- Stay in touch with your child’s teacher. Participate in parent-teacher conferences—in fall and in spring—to discuss your child’s progress.
- Set expectations for appropriate school behavior. Make sure your child understands the importance of following classroom rules, and knows that you expect good behavior throughout the school day.
- Give your child daily responsibilities, such as washing the dishes, folding laundry, helping with yard work, keeping an eye on a younger sibling for a few minutes, or helping make meals.
- Encourage healthy habits, such as eating nutritious foods, getting ample rest, having a regular bedtime, waking up on time, and being physically active. Talk to your child about personal hygiene.
- Visit local points of interest, including parks, museums, and the public library. Library cards are free for county residents.
- Share family stories and traditions. Encourage your child to talk to older family members about their experiences and family history.

Gwinnett County Public Schools
437 Old Peachtree Road, NW
Suwanee, GA 30024

For more information about the AKS, please visit www.gwinnett.k12.ga.us and click on “The AKS” in the “I want to… Get a copy of…” pull-down menu.

About Testing

Gwinnett County Public Schools measures student achievement in a number of ways to ensure students are learning the AKS curriculum. Students participate in classroom, district, and state assessments. Our assessment program helps teachers monitor students’ academic progress. Assessment data and information pinpoints students’ strengths and weaknesses. This focus allows teachers to plan targeted instruction that promotes each student’s success.

Testing in 5th Grade

All 5th grade students participate in the Cognitive Abilities Test (CogAT) assessment and the Iowa Tests in the fall.

CogAT provides information related to skills that are important for learning and problem-solving, both in and out of school. This test gives teachers details on how students learn so that teachers can develop appropriate learning objectives for each child.

The national, norm-referenced Iowa Tests provide information on student achievement based on common knowledge and skills. Norm-referenced tests allow scores to be compared to other students who took the same test following the same testing procedures. This test identifies strengths and weaknesses in basic skills so teachers can provide support.

The Georgia Department of Education administers the Georgia Milestones Assessment System (Georgia Milestones) which is a comprehensive assessment program. Students in grade 5 take an end-of-grade assessment in Language Arts, Mathematics, Science, and Social Studies. Learn more about testing on the GCPS website, or talk to your child’s teacher.
