

Glasses or contacts should be the last thing you have to worry about during this time. If you've lost, broken or damaged your eyewear due to the recent Hurricane Dorian, EyeMed Vision Care can help.

EyeMed members can simply follow these steps:

1. Call 1.866.652.0018 to talk to an EyeMed representative who understands the support available and will have policy-specific support, plus:
2. You can request (at no-cost) an emergency pair of replacement Adlens Adjustable Glasses. These allow you to temporarily adjust for different distances and switch focus for reading, computer and distance.

For emergency, replacement Adlens Adjustables, be prepared to provide the address of your choice where they can be shipped – or whether you will instead pick them up from a designated local store. That's it. A pair of Adlens Adjustable Glasses will be sent to you with free overnight shipping (must call by 2:30 pm EST for same-day processing).

3. Or, if you prefer to order permanent replacement glasses or contacts, your EyeMed representative can provide free, expedited shipping from Glasses.com and ContactsDirect.com

EyeMed understands the need for immediate assistance may extend beyond vision benefit members. If you know of residents in areas affected by Hurricane Dorian who don't have EyeMed Vision Care or other vision insurance benefits, and need financial assistance to obtain eyewear, OneSight can help.

Get local OneSight support information by calling 1.888.935.4589 or visiting www.onesight.org – look for the Get Help link at the bottom of the web page. OneSight is a non-profit organization EyeMed partners with that provides eye care and eyewear solutions for those in need around the globe.
